

### **Alternative Boiler Backhead Part**

Since going to press our team of experts have uncovered further documents illustrating an A1 boiler backhead. Based on this information, we are going to manufacture an alternative metal backhead face configuration which is more accurate for the 1928 model. This revised backhead will be supplied with issue 30. If you would like to use this alternative boiler backhead in your model, then you should NOT fix any parts to the backhead supplied with this issue.

Detailed information will be given in future issues on how to fix parts onto the new backhead.
